## About Me

Software developer with a front-end focus, building fast, user-friendly applications with an eye for detail and consistent structure, while expanding skills toward full-stack development.

## Education

### B.Sc. in Computer Science

Lebanese International University, 2022 - 2025

**GPA:** 3.66/4

**Honors & Certificates:** Dean's Honor List,  
President's Honor List, SAS Research Day

## Projects

### Ma7ali • POS PWA For Small Businesses

- Built scalable Firestore schema managing products, sales, customers, and real-time inventory
- Developed analytics dashboard with sales trends, top/low products, and stock alerts
- Implemented multi-currency support (LBP ↔ USD) and automated PDF reporting
- Led end-to-end development: architecture, UI/UX, and full feature implementation

### 3legant • E-Commerce Front-End

- Architected modular frontend structure (components, hooks, state, data layers) for scalability
- Built dynamic product grid system with state-driven layout switching (4x2, 3x3, horizontal)
- Developed reusable component library (cards, controls, layout selectors) with progressive rendering
- Implemented responsive system with custom hooks and led full frontend architecture end-to-end

### gRg • README Generator CLI

- Built interactive CLI to collect project data and inject into a centralized source of truth
- Automated project ranking and README generation for single and batch workflows
- Developed custom formatting engine handling nested data structures with consistent markdown output
- Designed scalable architecture separating data, logic, and templates for extensibility

**Additional Projects:** *Fitnesso, Quizo, Hekto* — see portfolio for details
